		ART UNIT		PAPER NUMBER
		2616		

DATE MAILED: 04/05/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	10/034,238	JOHANSSON ET AL.	
	<b>Examiner</b>	<b>Art Unit</b>	
	ALEXANDER BOAKYE	2667	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 25 January 2006.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1-6,9-16 and 19-21 is/are rejected.
- 7) Claim(s) 7,8,17 and 18 is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All    b) Some \* c) None of:
  1. Certified copies of the priority documents have been received.
  2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

#### Attachment(s)

- |   |   |
|---|---|
| 1) <input checked="" type="checkbox"/> Notice of References Cited (PTO-892)   | 4) <input type="checkbox"/> Interview Summary (PTO-413)                     |
| 2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)  | Paper No(s)/Mail Date. _____  |
| 3) <input checked="" type="checkbox"/> Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)<br>Paper No(s)/Mail Date <u>2/26/02; 2/19/03</u> | 5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152) |
|   | 6) <input type="checkbox"/> Other: _____                                    |

1. The certified copy of the foreign priority document filed on 03/25/2002 has been received.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6, 9-11, 12-16 and 19-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Wu et al. (US Patent # 6,799,039).

Regarding claims 1 and 9, Wu teaches a method of a server in connection with transmission of packet data to a wireless communication station via a wireless communication network (see Fig. 4) the method comprising: transmitting, from the server to the wireless communication station, a request for information relating to the radio transferring capabilities associated with the wireless communication station (column 7, lines 52-60) and adapting, at the server, the information content to be transmitted from the server to the wireless communication station based upon a

response from the wireless communication station to said request (the claimed information content is inherent in the data server 444 of Fig. 4 since the data server services a forward link data communication to the mobile station).

Regarding claim 2, Wu teaches that the adapting comprises adapting the information content with respect to the bandwidth of the radio transferring capabilities associated with the wireless communication station, thereby facilitating a smooth transfer of the adapted information content to the wireless communication station (column 2, lines 27-35).

Regarding claims 3 and 13, Wu teaches that the request for information comprises a request for the wireless communication's static radio transferring capabilities (the claimed wireless communication's static radio transferring capabilities is inherent in the mobile station 420 of Fig. 4).

Regarding claims 4 and 14, Wu teaches wherein the adapting is based upon a radio access classmark of the wireless communication station received in the response (the claimed access classmark is inherent in the mobile station 420).

Regarding claims 5 and 15, Wu teaches the request for information comprises a request for the wireless communication station's dynamic radio capabilities which currently are assigned to the wireless communication station (the claimed wireless communication station's dynamic radio capabilities are inherent in the mobile station 420 of Wu).

Regarding claims 6 and 16, Wu teaches that the adapting is based upon a radio priority allocated to the wireless communication station and received in the response (the claimed radio priority is inherent in the mobile station 420 of Wu).

Regarding claim 10, Wu teaches a computer-readable medium storing computer-executable components for causing a server which is operatively connected to a wireless communication network to perform the acts when the computer-executable components are run on general purpose computer included by the server (column 12, lines 59-67).

Regarding claims 11 and 21, Son teaches a server being operatively connected to a wireless communication network, the server including processing means, memory and interface circuitry means for performing the acts recited in claim 1 (the claimed processing means, memory, and interface circuitry means are inherent in the data server 444 of Fig. 4)

Regarding claims 12 and 19, Wu teaches a method of wireless communication station (420) in connection with reception of packet data via a wireless communication network to which the wireless station is operatively associated (see Fig. 4), the method comprising: receiving, from an originator of information, a request for information relating to the radio transferring capabilities of the wireless communication station (column 7, lines 18-22; the claimed radio transferring capability of the wireless station is inherent in the data server 444); and transmitting to the originator a response to the request, wherein information relating the radio transferring capabilities associated with the wireless communication station is included in response (column 7, lines 52-60).

Regarding claim 20, Wu teaches a computer-readable medium storing computer-executable components for causing a wireless communication station which is operatively associated with a wireless communication network to perform the acts recited in claim 12 when the computer-executable components are run on microprocessor included by the wireless communication station (column 13, lines 9-14).

***Allowable Subject Matter***

3. Claims 7, 8, 17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

4. Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Boakye whose telephone number is (571) 272-3183. The examiner can normally be reached on M-F from 8:30am to 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham, can be reached on (571) 272-3179. The Central Fax number is (571) 273-8300. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to Electronic Business Center numbers 866-217-9197 and 703-305-3028.
